

WHO DO WE WORK WITH?

Our use case portfolio encompasses top 10 Pharma companies, research institutes, government organisations and medical device companies. We are currently working with global trials that are recruiting many thousands of patients from over 30 countries, on 6 continents. Clinpal supports virtually any language and the patient-facing content is always translated into the local languages. Studies using Clinpal involve more than 22000 patients and more than 1600 study sites. Clinpal is also being used in smaller local trials in individual countries; this demonstrates the flexibility of the solution across many different use cases.

We have developed successful partnerships with our customers and this has led to repeated projects.

The table below summarizes some of the trials we are involved with.

SELECTED CLINPAL DEPLOYMENTS

CLIENT	STATUS	INDICATION	PHASE	DESCRIPTION
TOP 10 PHARMA		Diabetes	IV	Fully remote, online trial, using a SMART glucose meter integrated with Clinpal to capture blood glucose measurements in real time. 50 patients, 1 study site. Study completed with excellent results. Click here to request more information
TOP 10 PHARMA		Thrombosis	N/A	Bring Your Own Device (BYOD) eCOA validation study. Scientific work to develop a methodology and validate an ePRO patient questionnaire for use with patient's own devices. Involving 25 patients in Spain, Finland and the UK.
TOP 10 PHARMA		Asthma	III	Site engagement portal with e-Learning, and site documents. Deployed to 140 sites, covering 10 eLearning modules and an extensive document library with over 15 folders.
TOP 10 PHARMA		Asthma	III	Moderate to severe asthma and other related indications. Clinpal is utilized across this important program as the patient recruitment and engagement solution as well as a site portal. Several studies, more than 2000 patients and 400 sites in 21 countries.
TOP 10 PHARMA & RESEARCH INSTITUTE		Thrombosis	IV	10000 patient registry study, 500 sites, 25 countries. Clinpal is used as a comprehensive data capture solution, including eCRF's, electronic patient questionnaires and site support features.
TOP 10 PHARMA & RESEARCH INSTITUTE		Thrombosis	IV	5000 patient registry study, 700 sites, more than 20 countries. Clinpal is used as a comprehensive data capture solution, including eCRF's, electronic patient questionnaires and site support features.
TOP 10 PHARMA & GOVERNMENTAL RESEARCH SERVICE		Diabetes	IV	900 patient Diabetes registry. In a unique EHR/EMR integration study, Clinpal is used to recruit sites and patients based on a pre-qualification of candidates from an interface with national electronic medical records. Clinpal is used for candidate assessment screening, randomization, letter production and patient (ePRO) questionnaires for direct eSource data capture and integrated Protocol and GCP eLearning. Clinpal utilizes CDISC standard for data interchange.
MEDICAL DEVICE COMPANY		Glaucoma	IV	500 patient registry study for a medical device company. Using Clinpal for site training and data capture.
